

Workforce Dimensions™ Work

Improve Operational Performance with Real-Time Insights into Productivity Gain Critical Visibility into Workplace Productivity

Tracking labour activities is critical in determining the time spent on a specific job or work order. Without a solution to track labour against activities, organisations can only estimate the time spent per task, causing inaccurate pay, misquoted jobs and lack of understanding of the actual cost to build a product.

With Workforce Dimensions™ Work, organisations gain real-time visibility into workforce data to power more intelligent decision making — optimising efficiency, increasing employee productivity and ultimately improving operational performance.

Key Benefits

- » **IMPROVE WORKFLOWS** through simple integrations and accessible APIs
- » **ENHANCE THE EMPLOYEE EXPERIENCE** through flexibility, smart forms and simplistic data entry
- » **DRIVE OPERATIONAL EFFICIENCIES** with real-time visibility into labour data
- » **INCREASE PRODUCTIVITY** and efficiency with accurate standards

PRODUCT HIGHLIGHTS

SMART FORMS improve accuracy by introducing logic to show only necessary fields.
STATEFUL SYSTEMS makes data entry easier with relevant prompting.
ROBUST API INTEGRATION powered by Dell Boomi with easier access to API set expansions.
ACCURATE ACTIVITY SELECTION with new business structure framework.
